IMPORTANT SAFETY INSTRUCTIONS

WARNING: A WARNING alerts you to the possibility of serious injury or death if you do not follow the instructions.

CAUTION: A CAUTION alerts you to the possibility of damage or destruction of equipment if you do not follow the corresponding instructions.

WARNING: Failure to read, thoroughly understand, and follow all instructions can result in serious personal injury, damage to equipment, or voiding of factory warranty! It is the installer's responsibility to make sure all components are properly assembled and installed using the instructions provided.

WARNING: Failure to provide adequate structural strength for this component can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the structure to which this component is attached can support five times the combined weight of all equipment. Reinforce the structure as required before installing the component.

WARNING: Exceeding the weight capacity can result in serious personal injury or damage to equipment! It is the installer's responsibility to make sure the combined weight of all components located within the mounting system of the LCM2X1U/LCM2X1UP models does not exceed maximum weights listed in Table 1.

Table 1: Weight Capacity

MODEL	Max Weight Allowed for <u>EACH</u> Display	Max Weight Capacity of Mounting System
LCM2X1U	125 lbs (56.7 kg)	250 lbs (113.4 kg)
LCM2X1UP	125 lbs (56.7 kg)	250 lbs (113.4 kg)

			LCM2	X1UP
LCM2	_			
125 lbs	125 lbs		125 lbs	125 lbs

WARNING: Never operate this mounting system if it is damaged. Return the mounting system to a service center for examination and repair.

WARNING: Do not use this product outdoors.

NOTE: The LCM2X1U and LCM2X1UP ceiling mounted menu boards are intended to be used with the UL Listed CPA Ceiling Plates (not included): CPA330, CPA365, CPA395 and UL Listed extension brackets FCAX08, FCAX14 and FCAX20.

The following UL Listed Chief ceiling plates WITHOUT swaged collars (not included) may also be used: CMA330, CMA345, CMA395.

TOOLS REQUIRED FOR INSTALLATION

PARTS

INSTALLATION

IMPORTANT!: Refer to **Dimensions** section to find specific LCM2X1U/LCM2X1UP dimensions **BEFORE** proceeding with installation.

NOTE: The following procedure assumes that a UL Listed CPA or CMA ceiling plate (not included) and an extension column (not included) has been properly installed following instructions provided with ceiling plate and extension column.

NOTE: Proceed to Attaching Mount to NPT Column section or Attaching Mount to CPA Extension Column section, as appropriate.

Attaching Mount to 1-1/2" NPT Column

CAUTION: WATCH FOR PINCH POINTS! Do not place fingers between moveable parts.

 Insert two 5/16 x 3/4" set screws (W) into back of ceiling mount (CC). (See Figure 1)

Figure 1

- 2. Slide ceiling mount (CC) up from below onto installed column (not included). (See Figure 2)
- 3. Tighten two 5/16" set screws installed in Step 1 against column.
- 4. Thread bottom coupling (BB) onto installed column until tight, with a minimum of four threads engaged. (See Figure 2)
- Install and tighten one 10-24 x 1/4" set screw (T) into bottom coupling (BB). (See Figure 2)

Figure 2

- Loosen two installed set screws (W), and slide ceiling mount down extension column until it rests on the bottom coupling (B). (See Figure 3)
- Retighten two 5/16" set screws (W) against column. (See Figure 3)

Figure 3

Attaching Mount to CPA Extension Column

CAUTION: WATCH FOR PINCH POINTS! Do not place fingers between moveable parts.

 Insert two 5/16 x 3/4" set screws (W) into back of ceiling mount (CC). (See Figure 4)

Figure 4

- 2. Slide ceiling mount (CC) up from below onto installed column (not included). (See Figure 5)
- Tighten two 5/16" set screws installed in Step 1 against column.
- Slide bottom stop collar (AA) onto installed column, lining up holes in collar with holes in column.

Figure 5

- Install two 5/16" x 1" self-tapping screws (U) through two 5/16" flat washers (V), bottom stop collar (AA), and into installed column. (See Figure 5)
- 6. Install and tighten 5/16" x 3/4" set screw (W) into bottom stop collar (AA). (See Figure 5)
- Loosen two installed set screws (W), and slide ceiling mount down extension column until it rests on the bottom stop collar (AA).
- 8. Retighten two 5/16" set screws (W) against column. (See Figure 6)

Figure 6

Attaching Interface Brackets to Display

 Lower the latch mechanism on each interface bracket (EE). (See Figure 7)

Figure 7

Align the center of the interface bracket (EE) with center of screen. (See Figure 8)

NOTE: The diamond-shape hole in the bracket corresponds to the center of the mount.

Figure 8

WARNING: IMPROPER INSTALLATION CAN LEAD TO DISPLAY FALLING CAUSING SERIOUS PERSONAL INJURY OR DAMAGE TO EQUIPMENT! Using screws of improper size may damage your display. Properly sized screws will easily and completely thread into display mounting holes. If spacers are required, be sure to use longer screws of the same diameter.

 Select correct screws, spacers (if necessary) and universal washers from the hardware bag (A-N) and attach brackets (EE) to back of screen. (See Figure 8)

Attaching Display to Ceiling Mount

WARNING: IMPROPER INSTALLATION CAN LEAD TO DISPLAY FALLING CAUSING SERIOUS PERSONAL INJURY OR DAMAGE TO EQUIPMENT! The displays MUST be located equal distance from the column on each end of the ceiling mount.

- Ensure that the latch mechanisms on interface brackets (EE) are already lowered. (See Figure 7)
- While supporting both sides of display, lower display onto one side of ceiling mount, hooking top of interface brackets onto front of ceiling mount. (See Figure 9)
- Raise the latch mechanism on both interface brackets to lock bracket in place. (See Figure 9)

Figure 9

- Fasten bracket against ceiling mount extrusion using one 1/4-20 x 3/4" Phillips head machine screw (Y). (See Figure 10)
- 5. Repeat for other interface bracket.

Figure 10

- While supporting both sides of second display, lower second display onto other end of ceiling mount, hooking top of interface brackets onto front of ceiling mount. (See Figure 9)
- 7. Repeat Steps 3 through 5 for second display.

Adjustments

CAUTION: Watch for pinch points! Do not place fingers between moveable parts.

Roll

The ceiling mounts allow up to 3° roll each direction.

- Turn the roll adjustment bolt in the direction necessary for the desired roll. (See Figure 11)
- 2. Stop adjusting when the desired setting is reached.

Figure 11

Tilt

The interface brackets allow -5 $^{\circ}$ to 20 $^{\circ}$ tilt, and can be locked at 0 $^{\circ}$, 10 $^{\circ}$ and 20 $^{\circ}$ tilt.

- If necessary, loosen buttonhead tilt friction bolt (located on side of interface bracket). (See Figure 12)
- 4. Adjust tilt as required. (See Figure 12)
- The tilt may be locked at 0°, 10° and 20° using one 10-24 x 2-1/4" Phillips head screw (X) and one 10-24 lock nut (Z) per interface bracket. (See Figure 12)
- 6. Tighten buttonhead tilt adjustment bolt as necessary.

Figure 12

OPTIONAL: Security

 OPTIONAL: Add padlock (not included) to each interface bracket to lock display to ceiling mount. (See Figure 13)

Figure 13

Install back cover (DD) into four holes on back of ceiling mount. (See Figure 14)

Figure 14
